

Ex. No.:01	SAMPLE APPLICATION
Date : 24/07/2024	

Aim:

To create a simple React component that displays a welcome message, centered on the screen, with the text "SRMIST" in blue color.

Procedure:**1. Set Up the Project:**

- Initialize a React project using Vite or create-react-app.
- Navigate to the project folder and open the App.js file.

2. Code the Component:

- Define a functional component App.
- Use inline styles to set up a flex container, centering the text both horizontally and vertically in the viewport.
- Add a h1 tag that displays the welcome message and applies blue color to "SRMIST" using inline styling.

3. Run the Application:

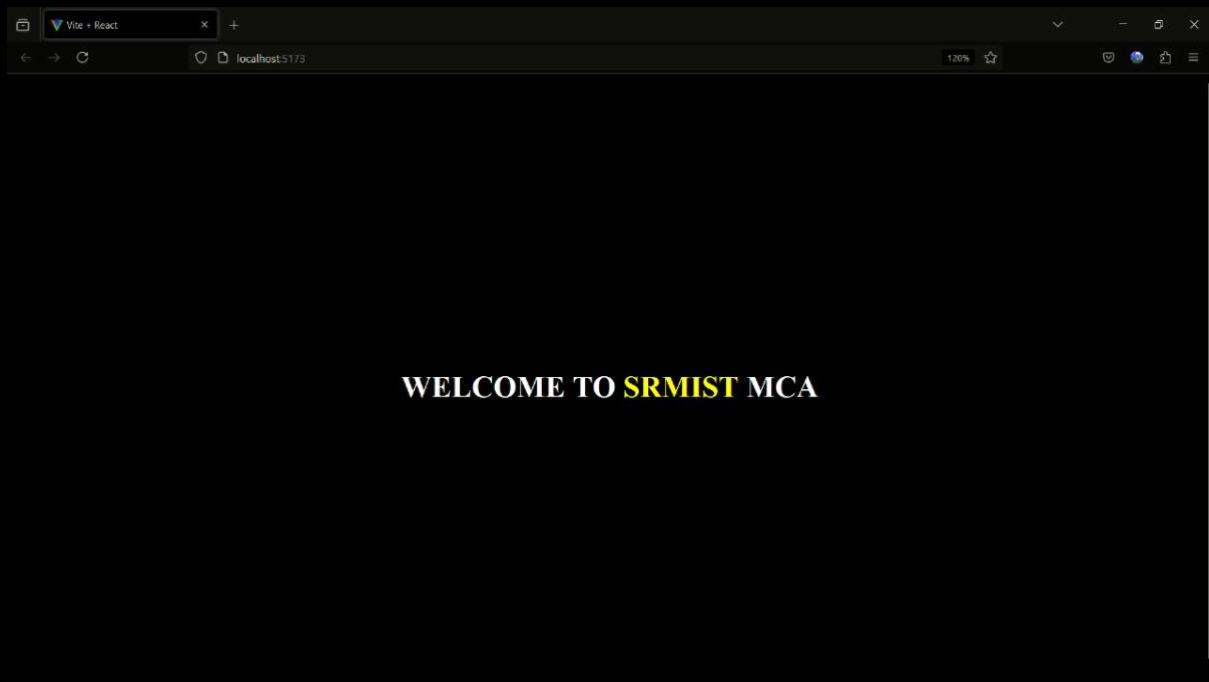

- Save the App.js file.
- Open a terminal and run npm start to start the development server.
- View the centered message in the browser.

Source Code:

```
function App() {  
  return (  
    <div style={{ display: 'flex', justifyContent: 'center', alignItems: 'center', height: '100vh' }}>  
      <h1>  
        WELCOME TO <span style={{color:'blue'}}>SRMIST</span> MCA  
      </h1>  
    </div>  
  );  
}
```

```
export default App;
```

OUTPUT:

**RESULT:**

The application displays a centered message, "WELCOME TO SRMIST MCA," with "SRMIST" in blue color, styled using inline CSS. The message is displayed at the center of the viewport, providing a simple and welcoming screen for SRMIST MCA studen
