STUDENTS REGISTRATION FORM USING LISTVIEW

AIM:

To develop an android App to implement LinearLayout and ListView.

ALGORITHM:

Step 1: Create a New project -> Empty view activity ->Finish

Step 2: Add the following components, LinearLayout and ListView

Step 3: Develop the MainActivity.java to add items in the ListView using ArrayAdapter class.

Step 4: Build and Run the App.

Step 5: Stop the Project.

DESIGN VIEW INPUT WINDOW:

CODE: XML

```
<?xml version="1.0" encoding="utf-8"?>

<androidx.constraintlayout.widget.ConstraintLayoutxmlns:android="http://schemas.a
ndroid.com/apk/res/android"

    xmlns:app="http://schemas.android.com/apk/res-auto"
    xmlns:tools="http://schemas.android.com/tools"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    tools:context=".MainActivity">
<LinearLayout
    android:layout_width="409dp"
    android:layout_height="665dp"
    android:layout_marginStart="1dp"
    android:layout_marginTop="1dp"
    android:layout_marginEnd="1dp"
    android:orientation="vertical"
    app:layout_constraintBottom_toBottomOf="parent"
    app:layout_constraintEnd_toEndOf="parent"
    app:layout_constraintHorizontal_bias="0.0"
    app:layout_constraintStart_toStartOf="parent"
    app:layout_constraintTop_toBottomOf="@+id/textView"
    app:layout_constraintVertical_bias="0.0"></LinearLayout>
<ListView
    android:id="@+id/list"
    android:layout_width="match_parent"
    android:layout_height="match_parent" />
</androidx.constraintlayout.widget.ConstraintLayout>
```

CODE: MainActivity.java

```
package com.example.kklistview;
import androidx.appcompat.app.AppCompatActivity;
import android.os.Bundle;
import android.widget.AdapterView;
import android.widget.ArrayAdapter;
import android.widget.ListView;
public class MainActivity extends AppCompatActivity {
    ListView l;
    //Spinner s;

    String registration[] = { "Students Registration Form", "Personal Details", "Academic
    Details", "Co-curricular Activities", "Extra Curricular Activities", "Skill Sets",
    "Project Detail"};
    @Override
    protected void onCreate(Bundle savedInstanceState)
    {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_main);
        l = findViewById(R.id.list);
        ArrayAdapter<String> arr;

        arr = new
        ArrayAdapter(MainActivity.this, android.R.layout.simple_spinner_item, registration);
        l.setAdapter(arr);
    }
}
```

OUTPUT

The screenshot displays an Android application interface for a 'Students Registration Form'. The top status bar shows the time as 12:28 and various system icons. The application title 'Students Registration Form' is at the top. Below it, a list of form sections is visible: 'Personal Details', 'Academic Details', 'Co-curricular Activities', 'Extra Curricular Activities', 'Skill Sets', and 'Project Detail'. The 'Project Detail' section is currently selected and expanded, showing a large, empty white area for input.

Students Registration Form
Personal Details
Academic Details
Co-curricular Activities
Extra Curricular Activities
Skill Sets
Project Detail

RESULT:

Thus, The Android Application has been developed and run successfully
