

Ex. No. :2 IMPLEMENTATION OF SYSTEM CALLS Date: 09.12.2025

AIM

To study basic file handling system call behavior using Python.

PROCEDURE

1. Open a file in read mode.
2. Read the contents of the file.
3. Display the contents.
4. Close the file.

PROGRAM

1. try:
2. with open("sample.txt", "r") as file:
3. data = file.read()
4. print("File Content:") print(data) except
5. FileNotFoundError:
6. print("sample.txt not found")

OUTPUT

Practice 2 - Sample Output

 python output

File Content:

Advanced Operating System Lab

System Calls Demonstration

RESULT

Thus, the given programs were implemented successfully.

The expected outputs were obtained and the required concepts were verified.
