

Ex. No. :6 IMPLEMENTATION OF FILE ACCESS METHODS
Date: 13.01.2026

AIM

To implement sequential file access in Python.

PROCEDURE

1. Create a file.
2. Write some records into the file.
3. Open the file in read mode.
4. Read and display the records sequentially.

PROGRAM

```
with open("data.txt", "w") as file:  
    file.write("Advanced OS Lab\n")  
    file.write("File Access Methods\n")
```

```
with open("data.txt", "r") as file:  
    print(file.read())
```

OUTPUT

Practice 6 - Sample Output

 python output

Advanced OS Lab

File Access Methods

RESULT

Thus, the given programs were implemented successfully.

The expected outputs were obtained and the required concepts were verified.
